# What is Workshare Professional

Workshare Professional reimagines multi-party review and collaboration and ensures the safe and accurate exchange of information, enabling the collaborative evolution of high value business documents.

Workshare Professional is a desktop application that automates managing changes to business documents, protects against unauthorized content disclosure and delivers the world's most secure PDF creation, all in one integrated solution.

Key features of Workshare Professional include:

- Comparison of Word, PowerPoint and PDF files, including image-based PDF files
- Ability to accept/reject in a comparison and then create new documents
- Advanced comparison features for Word and PDF files including one-to-many comparisons, version comparisons, and access from within Word and PowerPoint files
- Change notifications in Outlook to alert users to changes in received attachments
- Conversion from PDF to DOC format for local files and from within the DMS/CRM
- Advanced, interactive metadata cleaning/PDF creation/secure file transfer for attachments in Outlook
- Comprehensive content risk protection enabling the discovery and removal of hidden sensitive data as well as visible sensitive data
- Options to save and share Office documents to Workshare online
- Access and visibility into online collaborative workspaces directly from Office
- Secure file sharing from all devices and browsers with metadata removal and end-to-end encryption
- Centralized policy design and enforcement administrator tools
- ECM/DMS and OCR integration with desktop comparison features
- Centralized user account management and control
- Complete access to Workshare online functionality to share and collaborate on documents, including setting folder access and permissions, positional commenting and reviewer communications with presence indicators
- Desktop sync app to synchronize your online content to your local desktop

**Note**: Workshare Professional can be installed without Microsoft Office integration. In this case, the comparison functionality is only available from the Workshare Compare application and the metadata removal functionality is only available when sending emails.

# What's New in Workshare Professional 9

Workshare Professional 9 includes the following new features:

# Office 64-bit support

This release includes a full 64-bit version of Workshare 9. This is a 64-bit application that includes the full feature set of Workshare Professional/Compare/Protect/Connect. Previously, we had a standalone version of Workshare Compare that worked in a 64-bit Office environment. It had a limited feature set. Full system requirements are provided on page 22.

### Install

Workshare Professional 9 installs more smoothly with less user interaction required and installs fewer add-ins. For example, in Outlook, there is only one add-in and in Word, there are only two add-ins.

There is also rebranding and new messaging on the installation screens.

# PowerPoint comparison

You can now compare two PowerPoint presentations and review the differences between them. You can see whether entire slides have been moved or deleted as well as what changes have been made to text and objects within each slide. PowerPoint Compare is available from the desktop, from within an open presentation and by right-clicking a closed presentation both locally and in your DMS.

### **UI** modernization

The Workshare Compare for PowerPoint user interface has been modernized to make comparing documents an easier and more satisfying experience. The ribbon has changed – the icons are more relevant and reflective of their function and the options have been rearranged options so that what is most wanted and used is easier to get.

# Compare UI modernization

The Workshare Compare 9 user interface has been modernized to make comparing documents an easier and more satisfying experience. The ribbon has changed – the icons are more relevant and reflective of their function and the options have been rearranged options so that what is most wanted and used is easier to get.

# Apply changes in Compare

Compare 9 includes the ability to accept and reject changes and create a new document. This brand new functionality places Compare at the center of the review and comparison document lifecycle. You can easily understand the changes made to a document and you can focus on the changes that you care about using categories, and now you can create a new version of the document that includes all the changes you accepted and excludes all the changes you rejected.

You can accept and reject from all views in the Change Summary and then save into a new document or save the comparison (redline, original and modified) with your accept/reject selections as a Workshare Deltafile (WDF).

# Category view

Grouping changes into categories in Compare saves time when reviewing redlines so you can focus on important changes. Categories are not new but the ability to accept/reject an entire category of changes in one go is new and this introduces a fast and efficient review process.

When redlines are extremely long, there can be so many changes that it takes too much time to review them. Some of these changes you may not care about - a lawyer may not be interested in a font change (although a documentation manager would); some of these changes you definitely want to accept without any need for review. For example, the **Spelling Corrections** category includes spelling correction changes and you may be happy to bulk accept such changes. The **Word Variations** category includes changes where a word has been varied grammatically but not in meaning, such as fix changed to fixed or fixing, and again you may be happy to accept all of this type of change. The **Matching Changes** category includes changes that are the same like a name change from Client 1 to Client 2 in 200 different places and you can quickly accept them all in one go.

# Comparison of comments

We have always compared comments – as long as the **Display comments in Redline** parameter is selected in the Rendering set (**Comparison Options**). This parameter is off in the default rendering sets.

We have improved the way we show changes in comments. Prior to Update 5, comments were pulled into the body of the document and compared there. Now, they are maintained as comments so it is very easy to see that changes have been made to a comment.

```
[HS2]: I think
this is <u>FAR</u> too
familiar!
```

Also, there is a new category in Category View called **Comment Changes** that groups all changes to comments together.

You cannot apply changes to comments. A user can still select the checkbox next to a comment change but when clicking **Apply Accepted Changes**, the changes will not actually be accepted.

# Track change output

The Compare 9 ability to convert redlines to documents with track changes is greatly enhanced. Compare no longer uses Word for the conversion and redlines no longer include Workshare styles so the whole process is now faster and more accurate. Using this process, the changes are converted to track changes and you can implement the changes using Word's track changes functionality.

The convert to track change functionality is available from many places:

Convert the open redline to a track change document - In the **Home** tab, click **Word** and then **Open in Word with Track Changes** or right-click in the redline and select **Convert to Track Changes**.

Save the redline to Workshare Connect as a track change document - click Save to My Files and then As Word document with Track Changes.

Email the redline as a track change document - click **Email** and then **Attach as Word document with Track Changes**.

Save the redline as a track change document – click **Save As** and then **Word document with Track Changes**.

Share the redline on Workshare Connect as a track change document - click **Share** and then **As Word document with Track Changes**.

# Comparing from NetDocuments

When using Send to Application in NetDocuments, the Compare document selection dialog will now be displayed by default. This means users can further define their comparisons. For example, they can switch the original and modified documents or they can add further documents to compare. They can also change the rendering set applied and use the Fast comparison mode.

This is controlled by the **Display document selection dialog when using Send to Application** parameter in the WCM (**Integrations>NetDocuments**).

# Emailing changes only

There is a new option in Workshare Compare that enables users to send only the pages with changes when sending redline documents by email. The option is called **Attach as PDF (only pages with changes)** and is found under the **Email** option in the **Home** tab or File menu. This is useful when comparing lengthy documents and changes only appear on a few pages. Using this new option, only the changed pages in the redline are converted to PDF and a new email window is opened with the PDF attached.

# Compare footnote changes

Users have always been able to compare footnotes and endnotes using the **Compare Footnotes** parameter in the rendering set. Now there are 2 parameters relating to footnotes/endnotes. The new parameter (added to **Comparison Options**) is called **Detect Footnote/Endnote Numbering Changes**. This way users can still detect changes to footnotes/endnotes but they can choose NOT to detect changes to footnote/endnote numbering.

# Saving and sharing redlines to Workshare online

With Connect installed, you can save redlines to Workshare online so they will be accessible to you online at all times and you can share redlines to groups in Workshare online so you can collaborate on them with others.

You can save the redline as a Workshare Compare DeltaFile (WDF), which contains all three documents (original, modified and redline) as well as your 'Accept' and 'Flag' selections. You can also save just the redline as a DOC/DOCX, RTF, HTM, TXT or PDF file or you can save the redline as a track change document. The redline is saved to **My Files** (inside **Folders** in Workshare online).

You can share the redline as a PDF file or you can share the redline as a track change document. The redline is shared to a group in Workshare online and a link to the redline is sent to group members by email.

### Interactive Protect customization

There is a new category in the Workshare Configuration Manager – **Protection** > **Interactive Protect** – dedicated to Interactive Protect. In both User and Administrator mode, you can set which metadata will be visible in the Interactive Protect panel and whether it will be selected and cleaned by default.

In addition, administrators can set:

- What specific areas are available to users in the Interactive Protect panel and whether users can change settings in those areas – for example, Administrators can hide the Convert to PDF section or leave it visible but not allow users to change options within it.
- To automatically apply Interactive Protect settings even when the user does not click Apply.
- When to automatically display the Interactive Panel.

# Interactive Protect – automatic apply

Previously, when the user did not click **Apply** in the Interactive Protect panel, the default profile would be applied to the attachments. Now, if the user does not click **Apply**, one of two things could happen:

- If the parameter to automatically apply on send is selected in the Workshare Configuration Manager (Protection>Interactive Protect category), the Interactive Protect settings made in the panel will still be applied when the user clicks Send.
- If the parameter is not selected, no processing will occur.

**Note**: The **Auto apply on send for external emails** parameter is selected by default and the **Auto apply on send for internal emails** parameter is NOT selected by default.

### Interactive Protect – PDF individual attachments

With Protect 9, you can now select to convert individual attachments to PDF in the Interactive Protect panel rather than selecting to convert all or none.

Finally, the Interactive Protect panel now displays in the main Outlook window as well as the message window.

# Protect – sending large files

The Add Large Attachment button is now called Attach as Link and it is displayed by default. Use the **Attach as Link** button to save a large file to a folder in Workshare and send recipients a link to the location.

Interactive Protect can be configured to automatically send a link to files when an attachment exceeds a specified size. In this scenario, as soon as you attach a file above the specified size, they are automatically converted to links. This is configured in the Workshare Configuration Manager (**Protection > Sharing** category) by specifying a value for the **Automatically convert to link(s) when total attachment size exceeds** (**MB**) parameter.

Interactive Protect can also be configured to automatically select the convert to link option in the Interactive Protect panel when an attachment exceeds a specified size. In this scenario, as soon as you attach a file above the specified size, the **Replace all attachments with a link** checkbox in the **Convert to link** area is selected when the Interactive Panel displays. This is configured in the Workshare Configuration Manager (**Protection > Interactive Protect** category) by specifying a value for the **Automatically select 'Convert to link' when total attachment size exceeds (MB)** parameter.

# Protect – manage permissions

When you upload attachments to Workshare and send recipients links to the files in Workshare, you can set access permissions for the Workshare folder. For example, you can specify that access to the folder will expire after a certain date or that members of the folder can only view files and not download. Now you can modify those permissions after converting attachments to links but before sending your email using the Manage permissions option in the attachments bar.

### Protect - links shortcut

Whatever the Protect user experience set up in your environment, when you have a shortcut on the attachment bar, you can convert your attachments to links in a single click.

This is configured in the Workshare Configuration Manager (**Protection > Sharing** category) by selecting the **Display Link on attachments bar** parameter.

### Protect – additional Exclude Metadata parameters

The **Protection>Exclude Metadata** parameters enable you to exclude certain types of metadata from being removed when documents are cleaned. The types of metadata that can be excluded from cleaning are custom properties and field codes from Office documents and now markups from PDF files. When cleaning, the user can still select to clean these types of metadata and all custom properties, field codes or markups will be cleaned, except for the ones explicitly excluded in **Protection>Exclude Metadata**. These parameters apply when Workshare Protect is cleaning attachments (using Interactive Protect, the Protect Profile dialog or the Email Security dialog) as well as cleaning open Microsoft Office documents. The two new parameters are **Exclude Annotation Links (PDF)** and **Exclude Annotation Widgets (PDF)**.

### Save/share to Workshare online from Microsoft Office

With the Connect element installed, you can save your Office documents to Workshare online so they will be accessible to you online at all times and you can share your files to groups in Workshare online so you can collaborate on them with others.

You can save and share Word, Excel and PowerPoint files in their native format or converting them to PDF as you save or share. The file is shared to a group in Workshare and a link to the file is sent to group members by email.

### Workshare desktop app

The installation of the Connect element includes an updated desktop app - the application that syncs content between Workshare online and your desktop. This means that even when offline, you can access and review your Workshare content. You can also add updated files or new files and as soon as you are online again, they will be synced.

If your Professional installation is integrated with a DMS, the desktop app benefits from this integration too. This means, for example, when adding files to the desktop app, the default open location will be the DMS. This can be switched off in Preferences in the desktop app.

The desktop app is launched after installation of Professional and you sign in to Workshare once to retrieve license information and begin synchronization. A welcome page is displayed in desktop app.

The interface of the desktop app is very similar to that seen when accessing my.workshare.com through a browser.

### Workshare online inside Office

With the Connect element installed, you can display the Workshare Connect panel inside Office which provides a window into your shared documents in Workshare online. When you have shared a document into a collaborative workspace in Workshare online and you open the document locally, the Workshare Connect panel provides a view of what is happening with your collaboration. You can see the other reviewers (who you shared the document with) and whether they are online at the moment. You can also see how many comments have been made on the document and whether any new versions have been added to it. With a single click you can open the document in the Workshare web app and join in the collaboration by viewing comments and making your own comments.

When another reviewer adds a new version of the document, you are notified in the Workshare Connect panel. With a single click, that new version is opened in Word. Now the Workshare Connect panel will ask if you'd like to see what's different between this new version and the previous version. With a single click, both versions are compared in Workshare Compare.

# **NetDocuments integration**

The NetDocuments integration now includes the ability to convert documents to PDF from within NetDocuments using the send to application functionality.

### Click-to-run certification

Workshare 9 is now certified with Microsoft's click-to-run. Click-to-run is a Microsoft streaming and virtualization technology that is used to install and update Office products.

# Licensing change

Licensing of Workshare is done via my.workshare.com. When purchasing a Workshare product, you are required to create a Workshare account. A license entitlement is created and assigned to the account, waiting to be used. After installation, you are prompted to log in to your Workshare account in order to retrieve your license entitlements. This can be in either of the following ways:

 When File Share & Sync (the Connect element) is included in the installation, the Workshare desktop app is launched after install and you will see the following:

If you do not log in at this point, then.....

• The first time you access Workshare functionality, for example, by clicking any option in the Workshare tab, you will see the following:

Enter your Workshare credentials (email address and password) and click **Sign** in. Your license entitlements are retrieved and you have access to all Workshare functionality. This is the only time a user is required to log in to Workshare.

### Options removed

Some options that were previously available in Professional have been removed because the functionality is now available in a better and more accessible way. You will no longer see:

- Send for Review, Manage Changes
- Vertical Workshare panel in Office
- Redact
- Comparing within Word
- Displaying content risk inside the Workshare panel in Word
- Classification
- Reports

# System Requirements

The system requirements for Workshare Professional 9 are as follows:

Minimum System Requirements	Intel Pentium 4 3.2GHz processor 1.5GB RAM 1GB free disk space
Recommended System Requirements	Intel Core 2 DUO @ 2.2GHz AMD Athlon 64 X2 4400+ 2GB RAM 2GB free disk space

# Certified environments for Workshare 9 (32-bit version)

Workshare 9 (32-bit version) has been tested and certified in a number of environments. If your environment is not included in the following list, it may still be a compatible environment. Contact Workshare Customer Support (support@workshare.com) for any help.

For details of which environments previous versions of Workshare Professional/ Compare/Protect were certified against, refer to previous versions of release notes on the knowledge base.

**Note**: Unless otherwise stated, all environments are the English version with the enus language set.

### **Operating System:**

- Microsoft Windows 10 (32 bit and 64 bit)
- Microsoft Windows 8.1 (32 bit and 64 bit) + Japanese
- Microsoft Windows 7 SP1 (32 bit and 64 bit) + Chinese Simplified & French

### Citrix:

- With Microsoft Windows Server 2012 R2 (64 bit)
  - Citrix XenApp 7.5
  - Citrix XenDesktop 7.5
- With Microsoft Windows Server 2008 R2 SP1 (64 bit)
  - Citrix XenApp 6.5
  - Citrix XenDesktop 6.5
  - Citrix XenDesktop 5.6

**Note:** Check with your Citrix vendor about which Windows operating system supports your version of Citrix.

### **Microsoft Office System:**

- Microsoft Office 2016 (32 bit) including click-to-run
- Microsoft Office 2013 SP1 (32 bit) + Japanese including click-to-run
- Microsoft Office 2013 (32 bit) + Japanese
- Microsoft Office 2010 SP2 (32 bit) + Chinese Simplified & French
- Microsoft Office 2007 SP3 (32 bit)

### **Email System:**

- Microsoft Outlook 2016 (32 bit)
- Microsoft Outlook 2013 SP1 (32 bit) + Japanese
- Microsoft Outlook 2013 (32 bit) + Japanese
- Microsoft Outlook 2010 SP2 (32 bit) + Chinese Simplified & French
- Microsoft Outlook 2007 SP3 (32 bit)
- IBM Lotus Notes 9.0.1
- IBM Lotus Notes 9.0

**Note**: Interactive Protect and the replace email attachment with link features of Workshare are not supported in a Lotus Notes environment.

#### **Browsers:**

- Microsoft Edge, latest version
- Microsoft Internet Explorer 11
- Google Chrome, latest version
- Mozilla Firefox, latest version

#### Microsoft SharePoint:

Microsoft SharePoint 2013 SP1

### **DMS** Integration:

**Note:** Check with your DMS vendor about which Windows operating system supports your DMS.

#### NetDocuments

**Note**: If you want Workshare to be available when using the NetDocuments **Send to application** functionality, Microsoft Internet Explorer must be installed (although it does not have to be the default browser).

### iManage:

- FileSite 9.3.1
- FileSite 9.3
- FileSite 9.2
- FileSite 9.0 Update 6
- FileSite 9.0 Update 5 (+ EMM)
- FileSite 8.5 SP3 Update 5/6
- DeskSite 9.3.1
- DeskSite 9.3
- DeskSite 9.2
- DeskSite 9.0 Update 6
- DeskSite 9.0 Update 5
- DeskSite 8.5 SP3 Update 5/6

### OpenText:

- eDOCS DM 10
- eDOCS DM 5.3.1 COM only (Patch 5)
- eDOCS DM 5.3 COM only (Patch 5 Rollup 4 & 5)

### Worldox:

- GX3
- GX4

Workshare will endeavor to support future service packs of certified environments.

# Certified environments for Workshare 9 (64-bit version)

Workshare 9 (64-bit version) has been tested and certified in a number of environments. If your environment is not included in the following list, it may still be a compatible environment. Contact Workshare Customer Support (support@workshare.com) for any help.

For details of which environments previous versions of Workshare Professional/ Compare/Protect were certified against, refer to previous versions of release notes on the knowledge base.

**Note**: Unless otherwise stated, all environments are the English version with the enus language set.

### **Operating System:**

Microsoft Windows 10 (64 bit)

### Citrix:

- With Microsoft Windows Server 2012 R2 (64 bit)
  - Citrix XenApp 7.5

Citrix XenDesktop 7.5

**Note:** Check with your Citrix vendor about which Windows operating system supports your version of Citrix.

### **Microsoft Office System:**

- DeskSite 9.3 (64 bit)

### OpenText:

eDOCS DM 10 (64 bit)

Workshare will endeavor to support future service packs of certified environments.

# Important Information

- Secure PDFs Workshare Professional is unable to compare secure PDFs or convert secure PDFs to Word format. Secure PDFs are PDF files with security settings configured.
- POP/IMAP Workshare Professional does not support Outlook when it is configured with a POP or IMAP account.

# Important installation information

- Workshare Professional installs program files to a sub-folder within the Workshare folder named **Modules**.
- Install: A user is unable to install Workshare Professional if Microsoft Windows Installer 3.1 is not installed. This can be downloaded from the following location http://www.microsoft.com/downloads/details.aspx?FamilyID=889482FC-5F56-4A38-B838-DE776FD4138C&displaylang=en.
- Windows 7: When UAC is set to Default, running the Workshare Professional
  install displays the UAC prompt. You must approve the prompt and Workshare
  Professional will be installed. Running the Workshare Professional MSI silently
  will fail when UAC is set to Default because the user is not given the opportunity
  to approve the UAC prompt. Therefore for silent installs, disable UAC.

If you have installed any Alpha or Beta builds of Workshare Professional, we strongly recommend that you first uninstall them before installing Workshare Professional 9.

# Change Requests Fixed

The following are fixed customer change requests that have been validated for this release - for more information, please contact Customer Support.

CR#	FB#	Description
00431065	19552	Local Open or Save dialog box does not appear in Excel
01041861	36415	Request the ability to set as default 'Retain attachments in Sent Item' option
01049923	37955	Comparing a document with multiple versions from DeskSite does not auto-populate the correct versions
01050670	38252	Cannot Save Attachment' error displayed when forwarding emails containing linked images in the signature
01059200	39974	Unable to send zip folder with nested msgs with attachments when using desktop profile or advanced dialog

CR#	FB#	Description
01063259	40758	Unable to clean certain Word documents when 'Small text' metadata option is checked
01065211	41047	Outlook crashes intermittently when emails are being sent with attachments externally
01067629	41605	Signature is lost when cleaning Word files using Interactive Protect.
01068870	41798	Notification bar for Interactive Protect is not displayed correctly in Outlook 2016
01068093	41816	Sending redline from Compare creates 'A program is trying to access email address information
01069681	41926	Unable to save docs with long file-names into NetDocs when include document descriptions is enabled
01069584	41958	Password dialog triggers when sending a password protected document internally
01071356	42159	pcgREline Contents are removed from text Content Control boxes when 'Small Text' metadata is enabled
01072374	42251	Error when sending email with or without attachment to multiple distributions list
01072628	42370	White field codes in footer cannot be cleaned
01072933	42372	Page layout changes from legal to letter and is missing paragraphs when saving fast mode redline to PDF
01072975	42399	Linked signature images are stripped and sent as attachments when sending email with ACN and IP enabled
01073165	42484	Unable to clean and send a pwd protected PPT/X docs when a dot (.) and name/number before file extension
01073165	42486	Protect flagging PDF signature as invalid when sending and cleaning PDF attachment
01073730	42556	Interactive Protect panel does not automatically trigger when sending a Word document as an attachment
01073730	42950	Wrong attachment sent when same document name is in use
01077148	43136	0 KB document created when saving redline after comparing long file-names documents from Netdocuments
01078338	43345	Interactive Protect removes contents from DOCX docs when sending as attachments through Worldox or LFS
01070304	42009	Unable to compare documents containing comments into 7a

CR#	FB#	Description
01072685	42813	Workshare Compare for PowerPoint incorrectly being treated as suspicious by certain applications
01066299	41355	Applocker blocking certain Workshare DLLs
01079468	43516	Error when converting Excel documents to PDF using advanced PDF security and metadata options
01076208	43060	Error creating PDF when selecting pages to convert to PDF
01049903	37953	Comments are missing when saving redline as Word document with Track Changes
01081726	43873	Comparing documents with multi-level numbering list displays incorrectly in TER view
01075838	43055	Convert to PDF, saving or emailing as PDF takes a long time to complete in certain environments
01034329	35033	Batch cleaning replicates page numbers in Word when cleaning field codes
01060396	40182	'OK' button not responding when changing document name in Modified Document field
01061759	40460	'Remove metadata' option cannot be unchecked by default in Interactive Protect panel
01058370	39770	'Do you want to save changes to this message?' dialog pops up when closing Outlook
01060865	40291	Print preview showing SFTLinkPermission XML code
01054960	39073	Cleaning particular combination of Word, Excel or PPT files results in unexpected cleaning for document properties in Word files
01047815	37364	RPC error when converting Office documents to PDF using Interactive Protect
01061739	40432	404 error page or file not found when using convert to link and sending to your own address
00135815		Document comparison failure
00141308	21453	Request to change wording of 'Hidden track change'
00142455	21442	Request to remove 'workshare default' from list of rendering sets in Word
00148200	21360	Protect triggers when PAB contact name does not match Domino Directory

CR#	FB#	Description
00160489	20804	Ability to hide/disable/password-protect Administrator Mode accessible from Workshare Configuration Manager (User Mode)
00161391	21451	Removal of "Email Address " option from the WCM
00161392	21451	Removal of "Email User Name " option from the WCM
00165075	21454	Request to honour 'Shared as' property when converting to PDF and saving as a related document
00167135	12021	Asian/Wingdings characters entered in email body when pressing backspace
00170258		Request for 'Advanced Options' to Reflect Options Set through Configuration Manager
00175397		Request for SharePoint Connector to Support SharePoint Server Farms
00180823	11725	Convert file dialog box is displayed when using 'Convert to PDF' option in Workshare ribbon
00181923		Request for Compatibility with Windows Server 2012 (and with R2)
00182223	12905	Delay of 2 to 3 minutes when sending message with lots of embedded images
00184524	14312	Request to rename Save dialog to OpenText instead of Hummingbird
